

Three members of my family listen to K-Love on FM 106.7. I understand that there is a move to allow Low Power FM to take priority over regular FM translators. This would mean that my family might not be able to pick up the station we listen to. We are opposed to this. Listening to K-Love is very important to us. There are very few stations around that play contemporary Christian music. This is a very high quality program, please don't take it away from us. Thank you for considering my comment.
